

Electrolux Salamander

Super-grill salamander

Electrolux salamanders are perfect for grilling and gratin-baking your dishes. The range offers models for table-top or wall installation, with different grid-sizes and installed power.

The super-grill salamander on this sheet is equipped with gas high-power burners and a large grid that can be positioned on different heights.

GAS VERSION (MODEL SALG08S)

- Constructed in 430 AISI stainless steel.
- High-power burners with dual controls ensuring pre-heat temperature (300°C) can be reached in 20 minutes.
- Flame failure device, pilot light and piezo ignition. Removable top section and burners.
- Flue designed to minimize the escape of combustion gases during operation.
- One couple of support runners allows horizontal or angled positioning of the grids.
- Removable fat collection container.
- Cooking grids can simultaneously cook food on both sides without turning.

- Equipped with n.1 cooking grid, n.1 brander plate with n.1 support. For use with LPG or natural gas.
